WORDPRESS TECHNICAL SUPPORT

PROFILE

I'm passionate about websites and all things tech. Since my current role is mostly focused on WordPress, most of my work involves building websites, troubleshooting issues, and helping clients keep their sites running smoothly. I enjoy solving technical problems, improving websites, and continuously learning new technologies to grow my skills.

WORK EXPERIENCES

HOSTING.COM

WordPress Maintenance and Technical Hosting Specialist (Oct 2024 - Present)

I worked at [Fixed.net](#), a sister company of [Hosting.com](#), and was also responsible for supporting one of Hosting.com's products, Managed WordPress Hosting powered by [Rocket.net](#)

- **Support Team** (Oct 2025 - Present)

- Fixing broken WordPress websites, including fatal errors, WSOD, visual issues, simple content updates, code snippet implementation, custom theme/plugin troubleshooting, CSS edits, and plugin configuration, and other technical issues.
- Troubleshooting WooCommerce issues, including payment gateway problems, shipping configuration, and broken checkout functionality and other WooCommerce-related issues.
- Cleaning and investigating websites infected with malware or suspicious files to ensure site security and stability.
- Investigating and implementing website optimizations to improve performance, speed, and overall site stability.
- Handling live chat support for [Fixed.net](#) and [Hosting.com](#) by troubleshooting technical issues and providing product-related information.
- Handling phone support for [Fixed.net](#) clients by providing product-related information and customer assistance.

- **Maintenance Team** (Oct 2024 - Oct 2025)

- Auditing the website to identify outdated plugins, themes, WordPress core, PHP versions, as well as vulnerable or unsupported plugins.
- Creating staging sites cloned from live websites to safely test updates before deploying them to production.
- Troubleshooting issues caused by updates, plugin conflicts, or website errors.
- Handling website downtime incidents and restoring site functionality.
- Migrating websites to new hosting environments, including DNS configuration and setup.
- Monitoring websites to ensure uptime and quickly identify downtime issues.

DESKTEAM360

Frontend Web Developer (Jan 2023 - Oct 2024)

- Building and managing websites using CMS platforms such as [WordPress](#), [Shopify](#), [Wix](#) and other platforms.
- Assisting clients with various technical requests by understanding and configuring different platforms that support their business operations.
- Using automation tools like [Zapier](#) and [Make](#) to streamline workflows and improve efficiency.
- Performing routine maintenance, including updates, security checks, and troubleshooting technical issues.
- Improving website UI and interactivity to create a better user experience.
- Collaborating with the design team to achieve the best results in website development and user experience.

MOKA

Technical Support Specialist (Dec 2021 - Dec 2022)

- Assisting business owners in optimizing the use of the Moka POS application to support daily business operations.
- Performing maintenance on the Moka application and local network to ensure stable and smooth functionality.
- Installing and configuring local networks and printers for seamless integration with the Moka system.
- Providing training for business owners and cashiers on using the Moka application, from backend management to daily operational use.

DIGTIVE GLOBAL

Web Developer (Feb 2021 - Dec 2021)

- Designing and developing websites primarily using WordPress with a focus on performance, usability, and maintainability.
- Performing routine website maintenance, including security updates, monitoring, and troubleshooting.
- Configuring LAN networks to support reliable and efficient local connectivity.
- Managing hosting, domain, and DNS configurations to ensure website availability and optimal performance.

INTERNSHIP EXPERIENCE

PT. EASYSOFT INDONESIA

Quality Control Specialist (Feb 2021 - Dec 2021)

- Conducting quality assurance (QA) testing and creating checklists to ensure application features function properly.
- Configuring and maintaining LAN networks to provide secure and reliable connectivity.
- Troubleshooting technical issues on CentOS-based Linux servers.
- Performing basic penetration testing and security assessments on websites and servers to identify potential vulnerabilities and improve system security.

EDUCATION

SMK TELKOM MALANG (2017 - 2020)

Computer and Network Engineering

- SMK Telkom Malang is a vocational high school focused on technology and information technology. I majored in Computer and Network Engineering, where I learned computer systems, networking, server management, basic web development, and programming fundamentals.
